TROPICAL CYCLONE BULLETIN NR. 2F
Typhoon OBET (SAUDEL)
Issued at 11:00 PM, 24 August 2026

TRACK AND INTENSITY OUTLOOK
• **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.** • OBET has exited the Philippine Area of Responsibility (PAR) at 9:30 PM today. It will continue moving generally west northwestward and pass close or make landfall over the southern islands of Japan between tomorrow (25 August) and Wednesday (26 August) before moving generally westward and making landfall over the southeastern coast of mainland China by Friday (28 August). • OBET is forecast to steadily weaken while moving over the area of the southern islands of Japan and north of Taiwan. After OBET makes landfall over the southeastern coast of mainland China and moves further inland, it will weaken into a severe tropical storm by Friday and into a tropical depression by Saturday (29 August).

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless re-entry occurs, this is the final bulletin for this weather disturbance.
